

MPLS VPN Service

PCCW Global's MPLS VPN Service provides reliable and secure access to your network from anywhere in the world. This technology-independent solution enables you to handle a multitude of tasks ranging from mission-critical Enterprise Resource Planning (ERP), Customer Relationship Management (CRM), quality videoconferencing and Voice-over-IP (VoIP) to convenient email and web-based applications while addressing traditional network problems relating to speed, scalability, Quality of Service (QoS) management and traffic engineering.

MPLS VPN enables routers to tag and forward incoming packets based on their class of service specification and allows you to run voice communications, video, and IT applications separately via a single connection and create faster and smoother pathways by simplifying traffic flow. Independent of other VPNs, your network enjoys a level of security equivalent to that provided by frame relay and ATM.

Network diagram

Key benefits to your business

- A fully-scalable solution requiring minimal investment
- Guaranteed performance with prioritized traffic
- Supports multiple protocols and interfaces
- Secures intranet and extranet access anywhere in the world, with value-added services
- Control your network more easily and effectively
- A comprehensive end-to-end managed solution

Specifications

- MPLS VPN Service (RFC 4364)
- Physical port type: Nx64K, T1, E1, E3, DS3, OC3, STM1, OC12, STM4, Ethernet, Fast Ethernet and Gigabit Ethernet
- Bandwidth speeds: 64Kbps to 1,000Mbps
- 4 Classes of Service* (CoS) to support QoS: Gold, Silver+, Silver and Bronze

Gold	Real-time packet forwarding designed to meet delay-sensitive application requirements – e.g. VoIP and videoconferencing
Silver+	Assured level of performance with packet-loss commitments for mission-critical applications – e.g. streaming video and signalling
Silver	Assured level of performance with packet-loss commitments for business-critical applications – e.g. SAP, SNA, Oracle and Telnet
Bronze	Standard level of performance for normal applications – e.g. email, file transfer and intranet

* Applies to on-net cities only

Features

- Various connectivity options
 - Allows service interworking with other traditional legacy services
 - Supports nearly any local-access type, such as leased circuits, xDSL broadband and Metro Ethernet
- High performance backed by Service Level Agreements (SLAs) that cover activation, availability, transit delay, packet loss, jitter and mean time to restoration
- Remote access from anywhere via platforms such as broadband Internet, Wi-Fi and other wireless technologies
- Backup options including dual port and IPSec

Value-Added Services

- High Definition Video Communication Solutions
- Managed Router Service (MRS)
- Web-based service performance reports[#]
